

Fast-16™ PCR Instrument

Mini & Portable

Fast-16™ is a compact, yet high performance real time quantitative PCR system with the throughput of 1-16 samples per run.

Fast-16™ is equipped with a multi-channel fluorescence optical system. It's optimally suited for applications where portability, minimal space, fast time-to-result is required.

Fast-16™ portable mini PCR machine is fit for applications such as point-of-care molecular diagnostics test (POCT), food safety and environment testing, agriculture, or research lab use where bench space is limited.
